

The logo for Diálogos, featuring the word "Diálogos" in a red, cursive script font, with a red underline.

June 2021

Diálogos is a Danish non-governmental organisation working with development projects in South America, Asia and Africa. Restrictions on world travel due to COVID-19 has made it difficult for Diálogos to carry out project monitoring visits with local partner organisations.

In February 2021, in connection with a final evaluation of Diálogos KIMHECOP - Karamoja Indigenous and Modern Health Collaboration Project in Karamoja, Uganda, Diálogos employed the services of WINDs Consultancy. From our very first collaboration with WINDs consultants, it was evident they were professional, competent and dedicated in providing a high-quality service.

Their knowledge of Uganda, the project area and civil society issues is based on Winds solid experience working with themes relating to our project. Diálogos received a comprehensive evaluation with very valuable advice in relation to specific issues, such as, assessment of the project strategy, strengths, and weaknesses of the partner organisation and useful observations in addition to suggestions for future work areas. We will continue to use the services of WINDS consultancy in the future. We highly recommend other civil society organisations to use WINDs consultancy services.

Best regards,

KIMHECOP project team at Diálogos.
